Original File Anthony Scuderi 3-29-17.txt  
Min-U-Script® with Word Index

1 files.

2 Q. What kind of clinical consultants?

3 A. Nurses, RNs.

4 Q. Okay. And you did that for how long?

5 A. Until January 1, 2016.

6 Q. Then what was your job, January 1,  
7 2016?

8 A. Assistant vice president of individual  
9 disability benefits.

10 Q. During the time you were a clinical  
11 vocational director, was that the same level, in  
12 terms of your employment at Unum as the claims  
13 director, or was that a promotion?

14 A. It was the same level, I believe.

15 Q. Then January 1, 2016 you became an  
16 AVP; was that a promotion?

17 A. It was.

18 Q. And then how long were you in that  
19 job?

20 A. Until the end of October 2016.

21 [REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

1 a month, less than once a month?

2 A. Can't even define it. It was  
3 irregular.

4 Q. Did you ever discuss the information  
5 in those reports that showed the forecast  
6 recoveries in dollar amounts with your directors?

7 A. I did.

8 Q. What would be the nature of those  
9 conversations?

10 A. We would do a weekly check in,  
11 verbally.

12 Q. Okay. And what would be the nature of  
13 that conversation?

14 A. It would just be an update in relation  
15 to where we stand, in relation to where were  
16 projecting we'd be.

17 Q. So, in terms of where you stood versus  
18 where you were projected to be, where did those  
19 projections come from?

20 A. I would receive those from Maureen.

21 Q. Okay.

22 A. Or Scott, my previous manager.

23 Q. Do you recall what was in those  
24 projections?

1           A. It was usually a dollar and account  
2 number, in relation to where our portfolio claims  
3 were expected to be given, our historical  
4 expectations.

5           Q. Do you recall what that dollar amount  
6 was, in general terms?

7           A. I do not.

8           Q. Was it more than \$50?

9           A. I can't speculate an amount. I'm  
10 sorry, I can't.

11          Q. Where would we find that information  
12 to refresh your memory?

13          A. I assume it would be an actuarial  
14 calculation, so.

15          Q. How was it given to you?

16          A. Usually verbally.

17          Q. By?

18          A. My supervisor at the time, either  
19 Maureen or Scott.

20          Q. Okay. When you had that discussion  
21 with them, did you ever write those numbers down?

22          A. I did.

23          Q. What did you do with those documents?

24          A. I kept them on a document on my Excel

1 spreadsheet on my computer.

2 Q. Okay. Was that an Excel spreadsheet  
3 that you added to or that you've replaced numbers  
4 on as you went along?

5 A. Trying to recall. I think I may have  
6 replaced.

7 Q. Was this an Excel spreadsheet  
8 available on the network or just on your  
9 computer?

10 A. It was on just my computer.

11 Q. Did anyone else have access to it?

12 A. No, they did not.

13 Q. Okay. What information did you have  
14 on that Excel spreadsheet?

15 A. I kept information on claims that were  
16 identified as potential claims that were  
17 forecasted for recovery.

18 Q. Did that include the name of the  
19 insured?

20 A. It did.

21 Q. Did it include the claim number?

22 A. It did not.

23 Q. In addition to the name for the  
24 insured, did it contain the dollar amount for

1       that insured?

2           A.     Dollar amount in relation to?

3           Q.     The recovery?

4           A.     It contained the reserve information,  
5       yes.

6           Q.     Did it contain the reserve information  
7       for each individual insured that was on that  
8       spreadsheet?

9           A.     It did.

10          Q.     Did you also have totals for groups of  
11       those insureds on the spreadsheet, or did you  
12       just keep it individually?

13          A.     I had an aggregate number.

14          Q.     Okay. Did you also have what the  
15       forecast historic measures were on that  
16       spreadsheet?

17          A.     I did.

18          Q.     Did you have any other information on  
19       that spreadsheet, in terms of the calculations or  
20       the status of the claims?

21          A.     Not to my recollection.

22          Q.     Do you remember when you first started  
23       using that spreadsheet?

24          A.     I probably used it when I was the

1           A.    The day I left the company.   Would it  
2   be an okay time to ask for a break?

3                    MR. SHEA:  Yes.

4           Q.    Actually, that's probably a very good  
5   time.

6                    THE VIDEOGRAPHER:  We're now going  
7   off the record at 10:49 a.m.

8                    (Thereupon, there was a short  
9   recess taken.)

10                  THE VIDEOGRAPHER:  One moment,  
11  please.  We are back on the record at 10:59 a.m.

12                  Q.    Mr. Scuderi, just to keep us back on  
13  track, let me see if I can follow up on a couple  
14  things we were just talking about.

15                  Did you ever get a report from  
16  someone else that had an insured's name on it and  
17  a reserve amount related to recoveries?

18                  A.    I did.

19                  Q.    And what would be the nature of that  
20  report?

21                  A.    It was the change in status report.

22                  Q.    Okay.  And who did you get that from?

23                  A.    I typically received it from my  
24  supervisor's administrative assistant.

1           Q.    And when you say your supervisor, you  
2 mean Maureen Griffin or?

3           A.    Scott Williams.

4           Q.    Scott Williams. Do you remember the  
5 name of their administrative assistants?

6           A.    I do. Tammy Goodney.

7           Q.    And which one was she?

8           A.    She was Maureen's.

9           Q.    Okay.

10          A.    And Kim Lebow.

11          Q.    Okay.

12          A.    She was Scott's.

13          Q.    Now that we got that straightened out,  
14 let's go back to what you were telling me.

15                   So, you got the change in status  
16 report from the administrative assistant?

17          A.    Correct.

18          Q.    Was that emailed to you or given to  
19 you as a piece of paper, or more than one sheet?

20          A.    It was a document on a piece of paper,  
21 could be multiple pieces of paper.

22          Q.    Do you recall about how often they  
23 gave you those reports?

24          A.    Once a month.

1           Q.    And what was on that report, do you  
2 recall?

3           A.    To the best of my recollection, it was  
4 an insurer's name, a claim number, and the  
5 reserve associated with it.

6           Q.    Were these generally limited to people  
7 who were currently on claim, or did it include  
8 claims that had been filed, but the insured had  
9 not been paid anything yet, or is it mixed?

10          A.    It could be mixed.

11          Q.    Okay. Have you heard of something  
12 called a paid recovery plan?

13          A.    I haven't heard of that term,  
14 specifically, no, but I've heard of the term  
15 plan, yes.

16          Q.    What does that mean to you in that  
17 context of recoveries?

18          A.    It would be basically, in my context,  
19 what my portfolio of claims would expect to yield  
20 from a paid recovery perspective based upon  
21 historical performance.

22          Q.    And who would you share that  
23 information with?

24          A.    I would delineate that information to

1 my direct reports for their individual teams.

2 Q. Verbally, by email, by paper; what did  
3 you do?

4 A. Verbally.

5 Q. Did you ever give them that  
6 information on a piece of paper?

7 A. I did not.

8 Q. How would they know which claims you  
9 were interested in or were discussing with them?

10 MR. SHEA: Objection. Vague. No  
11 foundation.

12 A. The claims I received were usually  
13 ones that were populated by them, so I would  
14 assume they would have knowledge of that.

15 Q. Okay. So, when you disseminated the  
16 information to them, did you discuss particular  
17 insureds?

18 A. Not at that particular time, no.

19 Q. Did you discuss it at other times?

20 A. They would provide me updates on  
21 occasion.

22 Q. In terms of the recoveries that you  
23 were discussing with them, how did they know  
24 which claims you were discussing?

1 MR. SHEA: Objection. Vague.

2           A.     If there was a particular claim that I  
3     had a question about, I would refer to the  
4     insured's name.

5 Q. Okay. In a typical month, do you  
6 recall how many insureds would be on that list?

7 A. I don't.

8 Q. More than ten?

9 A. I don't know a number.

10 Q. was it more than two sheets?

11 A. It could have been.

12 Q. Was there at times it was more than  
13 two sheets of information?

14 A. Can't recall specifically.

15 Q. Where would we find these documents to  
16 refresh your memory?

17           A.    I'm not certain if they're available  
18 anymore.

19 Q. So, going back to what you said  
20 earlier, you got these reports from Maureen  
21 Griffin or from Scott Williams?

22 A. Which report are you referring to?

23 Q. The one you just told me about, the  
24 one that had the --

1 MR. SHEA: Objection. I think it  
2 mischaracterizes his original testimony.

3           A.    I think I informed you that I received  
4    it from their administrative assistant.

5 Q. Oh, I'm sorry. That's a good point.  
6 You got it from the administrative assistants.

11           A.     I would utilize it to populate my  
12 spreadsheet --

13 Q. Okay.

14 A. -- that we talked about previously.

15 Q. Okay.

16                   A.     Then I would disseminate that  
17 information to my directors as well.

18 Q. Okay. Then what did you do with that  
19 sheet of paper?

A. I ultimately would shred it.

21 Q. Okay. And just to clarify, this  
22 document that you were given by the  
23 administrative assistants did have individ  
24 insured's name on it?

1           A.    It did.

2           Q.    And reserve information?

3           A.    It did.

4           Q.    Okay. And you disseminated it to the  
5    directors verbally though?

6           A.    I did.

7           Q.    To your knowledge, did anybody ever  
8    make a copy of those sheets, once they were given  
9    to you, the sheet was in your possession?

10          A.    Not to my knowledge.

11          Q.    Okay. Were you aware of whether or  
12    not similar sheets were given to any of the other  
13    AVPs?

14          A.    I would presume they were.

15          Q.    Were you ever there when that  
16    happened?

17          A.    No, I was not.

18          Q.    How was it delivered from the  
19    administrative assistants? Did you go to them or  
20    did they show up at your office, or how did that  
21    work?

22          A.    It could've been either/or.

23          Q.    How long did you typically have those  
24    sheets before you shredded them?

1 administrative assistants gave you those reports,  
2 did you ever have the occasion to go back and  
3 discuss what was on those reports with Maureen  
4 Griffin or with Scott Williams?

5 A. Not in relation to specific claimants,  
6 no.

7 Q. Okay. What about in relation to  
8 either aggregate recoveries or any other metrics  
9 having to do with recoveries?

10 A. I did.

11 Q. Can you describe those conversations?

12 A. To the best of my recollection, it  
13 would just be very general, in relation to, this  
14 is where we're currently at from a paid recovery  
15 perspective, and this is where we're expecting to  
16 be.

17 Q. The forecast that you were discussing  
18 with her that you described earlier, was that  
19 part of this conversation as well?

20 A. That would be kind of ultimately,  
21 based upon historical expectations, where our  
22 blocks should perform to. So, yes, that would be  
23 a part of the discussion.

24 Q. Okay. So, would you describe it as a

1                   One could be an insured was  
2   expected to go back to work based upon, we have a  
3   statement from their doctor expecting them to go  
4   back to work in May or June. So, that could be a  
5   reason.

6                   There could be a potential other  
7   plan discussion with a physician where a return  
8   to work plan is being discussed and the potential  
9   for an accelerated payment and closure of the  
10   claim as well. So, depending on the current  
11   status of the claim.

12                  There could be an independent  
13   examination that's pending. I don't know if it  
14   would be an ongoing paid claim or not paid claim.  
15   That could be another reason.

16                  Q.    Okay. When you disseminated the  
17   information that you got originally from Maureen  
18   Griffin's administrative assistant to your  
19   directors, or Scott Williams' administrative  
20   assistant to your directors, what did you talk to  
21   them about? What was in that conversation?

22                  And especially in terms of the  
23   historic forecast goals you talked about, I think  
24   is how we'd call them.

1           A. I would discuss with them, probably at  
2 the beginning of the month, I would let them know  
3 what their block was expected to produce.

4                   And then once I did receive that  
5 report, I would let them know, based upon what  
6 they had forecasted what those claim's  
7 approximate value were.

8           Q. By expected to produce, what do you  
9 mean by that?

10          A. What the historical data would suggest  
11 that from a paid recovery perspective, their  
12 claim block should result in on a month to month  
13 basis.

14          Q. Was this in terms of dollars or number  
15 of claims?

16          A. Both.

17          Q. So, part of what you would discuss was  
18 the expected amount of dollars from recoveries  
19 for that month, if I'm understanding you?

20          A. That's correct.

21          Q. Okay. When a director's team wasn't  
22 able to produce the number of recoveries in terms  
23 of dollars to come close to those forecast  
24 amounts, what was the result of that; what would

1 happen?

2 A. Nothing.

3 Q. What would happen over time?

4 A. Nothing, to my recollection.

5 Q. What was the point of the conversation  
6 if nothing would happen?

7 A. To let them know, in summary, where  
8 they ended up in a particular month, but there  
9 would be no punitive action taken against them.

10 Q. If they did regularly meet those  
11 levels, was there any additional reward for them?

12 A. Not to my knowledge.

13 Q. Why did you have the conversations  
14 with them then?

15 A. It was part of their assessment of  
16 their overall performance, so it was important to  
17 let them know about that, as well as other  
18 performance metrics within their block of  
19 business.

20 Q. So, it did affect their assessment?

21 A. It was a part of their assessment.

22 Q. Is it fair to say it was a factor in  
23 their assessment?

24 A. I would say that, yeah, it's fair.

1 17 of 103.

2 And then further in the document,  
3 it's 2 of 103, through 6 of 103, all part of the  
4 same exhibit.

5 Then on the very first page for  
6 identification purposes, it has the title, "ID  
7 Director, scorecard as of 3/31/2013." You with  
8 me now?

9 A. I am.

10 (ID Director Scorecard [Exhibit 10](#)  
11 was marked for identification.)

12 Q. Describe what that document is.

13 A. This appears to be the ID director  
14 scorecard that was for Sarah McKinnen.

15 Q. Okay. What was this used for?

16 A. This contained information about a  
17 particular director's block of business, captured  
18 some service metrics and quality metrics.

19 Q. Okay. Were there other metrics that  
20 applied to a director that were not captured on  
21 here?

22 A. There's not financial operational  
23 metrics on the scorecard.

24 Q. By financial operational metrics, what

1 do you mean?

2       A. Anything relating to the results of  
3 their teams, in relation to paid recoveries,  
4 claims transferring, max ben settlements,  
5 anything like that.

6       Q. When you use the term 'operational  
7 metrics,' give me your definition of that.

8       A. I use that term in relation to the  
9 count of metrics, in relation to dollars.

10      Q. So, operational metrics would include  
11 keeping track of recoveries?

12      A. That would be one use of it.

13      Q. Keeping track of paid recoveries?

14      A. And other things as well, yup.

15      Q. Would forecasting of recoveries be  
16 part of operational metrics?

17      A. I don't know if I consider that an  
18 operational metric.

19      Q. The amount that a director's team  
20 recovered for a given month, would that be an  
21 operational metric?

22      A. I don't consider dollars an  
23 operational metric. I consider that a financial  
24 metric.
